3.5 **Service Re-engineering**

3.5.1 The Treasury Management budgets essentially relate to the financing costs of asset management with the related staffing and accommodation running costs being held within departmental budgets. Consequently there is no service re-engineering target for this particular budget.

3.6 **Variations**

3.6.1 The Asset Management budget has income and expenditure of over £39 million and around £15 million per annum respectively which due to its size and complexity may vary significantly. Any variations in interest rates and market conditions, for example, would impact on these budgets. All budgets continue to be monitored and at this stage no significant variations have arisen.
