

WIRRAL COUNCIL

AUDIT AND RISK MANAGEMENT COMMITTEE

30 JUNE 2010

REPORT OF THE CHIEF INTERNAL AUDITOR

INTERNAL AUDIT WORK: APRIL TO MAY 2010

1. EXECUTIVE SUMMARY

- 1.1. In order to assist in effective corporate governance and fulfil statutory requirements, the Internal Audit Section of the Finance Department reviews management and service delivery arrangements within the Council as well as financial control systems. Work areas are selected for review on the basis of risks identified on the Corporate Risk Register and as assessed by Internal Audit in consultation with Chief Officers and Managers.
- 1.2. This report identifies and evaluates the performance of the Internal Audit Section at 2. and includes details of the actual work undertaken over the period and the number of 'High' and 'Medium' risk recommendations identified in reports at 3. There are no items of significance identified during the audit process that require action by the Members for this period.
- 1.3. The Internal Audit Plan for 2010/11 was approved by this Committee at its meeting in March 2010.
- 1.4. The Internal Audit Plan identifies all of those audits required to provide the Council with adequate assurance regarding the effectiveness of its systems in operation to manage and mitigate all of the identified risks to the achievement of the Council's objectives. It is essential therefore that the audit plan is delivered to ensure that the 'annual assurance opinion' on the effectiveness of the Council's control environment is not qualified and supports the delivery of the Annual Governance Statement. Although in the very early stages of the delivery of the plan, the Section is confident of achieving this objective by year end.

2. INTERNAL AUDIT – PERFORMANCE

- 2.1. This report summarises the audit work completed between 1 April 2010 and 31 May 2010. The specific nature of the work that has been undertaken or is currently ongoing is identified in Appendix I. 30 audit reports were produced during this period identifying 31 high and 26 medium priority recommendations. Management has agreed to implement all of the recommendations made within a satisfactory timescale. Those reports identifying high and medium priority recommendations are analysed in more detail in section 3 of this report.

2.2. The Section constantly evaluates the effectiveness of its performance including a number of performance indicators in key areas as identified for the period 1st April 2010 to 31st May 2010:

2.2.1. To ensure that the Internal Audit Plan is delivered by the 31 March 2011.

2.2.1.a. This is an input based measure i.e. the estimated number of days required each month to deliver the whole of the Internal Audit Plan. 4250 days are actually required to deliver the plan for this year, equating to approximately 355 days per month. As can be seen from the graph, no more than 77% (273 days) of the resource days have been available each month to date. This is mainly due to staff resources being unavailable as a result of vacancies and some members of staff being deployed undertaking investigations that were not included in the plan. This shortfall is not considered significant at the moment and the Section remains confident that its targets can still be achieved, provided that the situation does not deteriorate. This will continue to be very closely monitored by management and any appropriate actions taken as needed and reported to this Committee.

2.2.2. To ensure that all planned audits are completed.

The Internal Audit Plan comprises a substantial number of audits essential to the provision of the 'annual assurance opinion' and are designed to review the key risks to Council systems. Delivery of these audits accounts for 3030 days of the plan. The remainder of the plan, 1220 days relates to audits designed to evaluate the effectiveness of the Council and the achievement of its overall objectives and whilst important are not necessary to support the actual assurance opinion. This 'other' work is considered essential to the well being of the organisation and complies with CIPFA best practice guidance. Work identified in this area includes the Strategic Change Programme, Managing Fraud audits and some ICT projects. It is essential that all of the assurance opinion work is completed in the year to enable the opinion on the effectiveness of the Council's control environment to be provided. The graph below identifies the planned audits completed each

month for the year to date, subject to variances arising from the changing dynamics of the plan, including requests from Chief Officers and Members for additional work. With a full complement of staff for the year it is expected that nearly 600 audit reports including follow ups, some of which relate to the 2009/10 Audit Plan, will be issued.

- 2.2.2.a. To date 30 reports plus follow ups have actually been produced representing 30% of those planned for the period. This figure might appear low, however it does not though include a significant number of audits, including follow ups, that are currently ongoing and scheduled for completion later this period and as identified at Appendix I. It also does not take account of a large number of jobs that were included in the previous year's plan and have been brought forward for finalisation during the early part of the current year. This anomaly should be addressed at the end of the current financial year when a proportion of jobs being worked on from the current years plan are carried forward into 2011/12 for completion.
- 2.2.2.b. Overall performance is however slightly below target for the time of year, primarily as a result of requests for audits and investigations not originally included in the audit plan. This is not considered serious at this stage and it is my opinion that this shortfall can be made up during the remainder of the year. The position will continue to be monitored and any appropriate actions taken to ensure continued delivery of the plan and these actions notified to this Committee in due course.
- 2.2.2.c. The chart also clearly indicates that of the audits completed to date, a significant proportion represent work undertaken to support the 'annual assurance opinion'. This reflects the deliberate policy of the Internal Audit Section to complete as many of these audits as early as possible, however for operational reasons some of these audits cannot be delivered until later in the year. The Section has all of these audits scheduled for the remainder of the year and is confident that the target of completing these by the year end will be achieved.

2.2.3. Percentage of Customer Satisfaction Forms returned indicating a 'good' opinion of the service.

2.2.3.a. Customer survey forms are completed by the clients following the completion of an audit and pose a number of questions relating to the actual audit, its findings and the conduct of the auditor. The chart identifies the percentage of those forms returned that indicate a positive opinion of the service. This clearly indicates that the Internal Audit Section is viewed very positively by its clients and is regarded as adding value to the systems that it audits. Where feedback from clients identifies issues appropriate measures have been taken by management to address these and prevent any re-occurrence.

2.2.4 Follow up Audits

To comply with current best practice and Audit Commission recommendations, follow-up audits are undertaken for all completed audits up to six months after the completion date, to confirm the implementation of agreed recommendations. The majority of the required follow up audits completed this period relate to work undertaken in the previous year. No significant delays have occurred in this area despite the resource problems experienced to date. No outstanding issues were identified that require the attention of the Audit and Risk Management Committee at this time.

3. INTERNAL AUDIT PLAN - PROGRESS OF WORK

3.1 The following table identifies audits undertaken over the period which include recommendations of a high and Medium priority nature. The table also indicates the audit opinion provided on the effectiveness of the control environment, where 4* indicates an excellent rating.
