

APPENDIX A

Community Energy Efficiency Fund - Technology List

Project Type	Work Type
Boilers	Boilers - control systems Boilers - replacement Boilers - burner management
Building Management Systems	BEMS - not remotely managed
Computers & IT Solutions	Network PC power management
Heating	Thermostatic Radiator Valves Radiator reflective foil
Hot water	Hot Water - Improved time controls Improved insulation
Insulation	Cavity wall insulation Loft insulation Insulation - draught proofing Heating pipework insulation (internal)
Lighting Controls	Lighting - discrete controls Lighting control system centralised
Lighting Upgrades	LED lighting Electronic ballast with dimming control Compact Fluorescent including changing the fitting Compact Fluorescent using same fitting T5 lighting including changing the fitting T5 lighting retrofit using adaptors T8 lighting including changing the fitting T8 lighting retrofit using adaptors
Motor Controls	Variable speed drives
Motor Replacement	Motors - high efficiency
Office Equipment	Office equipment improvements
Renewable Energy	Biomass boilers Solar Water Heating Photovoltaic Panels Wind Generation
Time Switches	Time switches to electrical equipment
Ventilation	Fans - install destratification fans Ventilation - presence controls
Voltage Reduction	Voltage optimisation equipment
