Low socio-economic status / Socially excluded people	Positive - This travel plan will assist people in some of our most disadvantaged communities to access health care by increased awareness of public transport options. Low socio-economic status / Socially excluded people	Negative - There cost of using public transport is a potential barrier to patients or visitors accessing the site and who can not afford public transport and do not have access to a car. The cost of public transport could increase further if there is a need for interchange.	Continue to work with Merseytravel to improve accessibility to health care	Merseytravel	On-going	N/A

**Section 5a: Where and how will the above actions be monitored?**

Through the next review of the WUTH Trust's Travel Plan to committee in 2014 and through the Local Transport Plan

**Section 5b: If you think there is no negative impact, what is your reasoning behind this?**

The WUTH NHS Trust's Travel Plan has been developed to help to support individuals who may be socially excluded by improving their accessibility to employment and to healthcare. Health inequalities are addressed, especially through promotion of healthier modes of transport such as walking and cycling. Sustainable transport assists in the reduction of carbon emissions and therefore improves air quality. Increased use of public transport can reduce the number of single occupancy vehicle trips.

**Section 6: What research / data / information have you used in support of this process?**

The travel plan is supported by the NHS Carbon Strategy. It follows advice published by the Dept for Transport in their Good Practice Guidelines: Delivering Travel Plans through the Planning Process. The DfT has produced research into the benefits of travel planning in the report of the sustainable travel times <http://www.dft.gov.uk/publications/the-effects-of-smarter-choice-programmes-in-the-sustainable-travel-towns-summary-report/>
