Key to Terms and Codes Used in the Rear Window Schedule:

Materials: Wood or Metal. Describes the frame material for the window. Metal windows are not covered in the LLBCO.

Leaded: Indicates whether existing or appropriate windows have leaded lights. Windows with leaded lights are not covered in the LLBCO.

Not In Order: Indicates whether windows are not covered by the LLBCO. Most windows excluded from the LLBCO are metal, leaded, or awning windows.

Types: Indicates the operation (how it opens) of the window.

CT: Casement or side-hung windows

FXD: Fixed. Windows that do not open

DH: Double-hung or vertical sliding sash windows

YS: Yorkshire sliding sash or horizontal sliding sash windows

AWN: Awning or top-hung sash. Not covered by the LLBCO

Panes of Glass: Describes the number and configuration of individual glass panes in each sash.

Grouping: Describes the number of windows in an assembly found at the property.

Key to Terms and Codes Used in the Rear Window Schedule:

Materials: Wood or Metal. Describes the frame material for the window. Metal windows are not covered in the LLBCO.

Leaded: Indicates whether existing or appropriate windows have leaded lights. Windows with leaded lights are not covered in the LLBCO.

Not In Order: Indicates whether windows are not covered by the LLBCO. Most windows excluded from the LLBCO are metal, leaded, or awning windows.

Types: Indicates the operation (how it opens) of the window.

CT: Casement or side-hung windows

FXD: Fixed. Windows that do not open

DH: Double-hung or vertical sliding sash windows

YS: Yorkshire sliding sash or horizontal sliding sash windows

AWN: Awning or top-hung sash. Not covered by the LLBCO

Panes of Glass: Describes the number and configuration of individual glass panes in each sash.

Grouping: Describes the number of windows in an assembly found at the property.

Key to Terms and Codes Used in the Rear Window Schedule:

Materials: Wood or Metal. Describes the frame material for the window. Metal windows are not covered in the LLBCO.

Leaded: Indicates whether existing or appropriate windows have leaded lights. Windows with leaded lights are not covered in the LLBCO.

Not In Order: Indicates whether windows are not covered by the LLBCO. Most windows excluded from the LLBCO are metal, leaded, or awning windows.

Types: Indicates the operation (how it opens) of the window.

CT: Casement or side-hung windows

FXD: Fixed. Windows that do not open

DH: Double-hung or vertical sliding sash windows

YS: Yorkshire sliding sash or horizontal sliding sash windows

AWN: Awning or top-hung sash. Not covered by the LLBCO

Panes of Glass: Describes the number and configuration of individual glass panes in each sash.

Grouping: Describes the number of windows in an assembly found at the property.

Key to Terms and Codes Used in the Rear Window Schedule:

Materials: Wood or Metal. Describes the frame material for the window. Metal windows are not covered in the LLBCO.

Leaded: Indicates whether existing or appropriate windows have leaded lights. Windows with leaded lights are not covered in the LLBCO.

Not In Order: Indicates whether windows are not covered by the LLBCO. Most windows excluded from the LLBCO are metal, leaded, or awning windows.

Types: Indicates the operation (how it opens) of the window.

CT: Casement or side-hung windows

FXD: Fixed. Windows that do not open

DH: Double-hung or vertical sliding sash windows

YS: Yorkshire sliding sash or horizontal sliding sash windows

AWN: Awning or top-hung sash. Not covered by the LLBCO

Panes of Glass: Describes the number and configuration of individual glass panes in each sash.

Grouping: Describes the number of windows in an assembly found at the property.

Key to Terms and Codes Used in the Rear Window Schedule:

Materials: Wood or Metal. Describes the frame material for the window. Metal windows are not covered in the LLBCO.

Leaded: Indicates whether existing or appropriate windows have leaded lights. Windows with leaded lights are not covered in the LLBCO.

Not In Order: Indicates whether windows are not covered by the LLBCO. Most windows excluded from the LLBCO are metal, leaded, or awning windows.

Types: Indicates the operation (how it opens) of the window.

CT: Casement or side-hung windows

FXD: Fixed. Windows that do not open

DH: Double-hung or vertical sliding sash windows

YS: Yorkshire sliding sash or horizontal sliding sash windows

AWN: Awning or top-hung sash. Not covered by the LLBCO

Panes of Glass: Describes the number and configuration of individual glass panes in each sash.

Grouping: Describes the number of windows in an assembly found at the property.
