Corporate Risk No. 6 – Effect of demographic changes on demand for services

Risk Description		Lead Responsibility				
<p><i>People living longer is clearly positive and presents opportunities for the council and its partners, but also brings additional requirements and costs. Extra demand could be driven by the trend in some communities for people to develop chronic conditions at an earlier age, because of health inequalities, and living longer with them. Residents will need to do more for themselves. But some communities are less resilient and well-resourced than others. Young people have higher expectations than previous generations and a failure to provide educational and employment opportunities could lead to the trend for them to move away from the area to continue.</i></p>		Strategic Director – Families & Wellbeing
