

Cabinet - Minute 19 - Domestic Refuse Collection Outline Business Case

The signatories to the call in feel that the cabinet is wrong to consult on changes to the collection of waste in Wirral based upon only presenting two options to improve recycling to the public, including the possibility of moving to a three weekly collection of residual waste. This decision effectively limits the feedback that the council could receive from residents on the best ways of achieving 50% or more recycling rates within their communities. This call in requests that cabinet engage in a more open and wide ranging consultation on waste management with the people of Wirral over a longer three month period in order to gauge public opinion of the cabinets 3 weekly option and to consider alternatives.

Called in by the all the members of the Liberal Democrat Group and Councillor Ian Lewis.
