Answer to supplementary question

Mr Alan Featherstone asked a supplementary question regarding whether Birkenhead Market rents had not been increased between October and November 2021. The Chair responded that he did not have those facts available to him and that he would respond in writing.

Answer: It can be confirmed that the Council did not increase the Birkenhead Market rents between October and November 2021. The council however did take the difficult decision to maintain current rental values over recent years with significant increases in inflation therefore giving a real value decrease in traders rents when compared to increasing costs.
