

Programme Commentary

Approval was sought and given at the November STG meeting to change the scope of LD & Autism project to now include All Age Disabilities. The change of scope will not currently impact on the range of projects which already incorporated All Age disabilities as an element of their work. Work continues on a number of strategies which will form an understanding of the projects required in 2024/25 to deliver the findings

Headline Metric (NCTR): This metric	is captured as a	snapshot on tl	•			•	shows cor	ntinued ad	ood progress with a reduction from the previous
	o 108 on the 1st	lovember be							
6th November, with the NCTR numb		November, no	wever the targ	et of 100 w	as not acl	nieved	. Interim d		rs the milestone target of 100 was exceeded on the

The programme trajectory post 1st November has been developed which aims to maintain the 100 position given the pressures forecast for Winter. The trajectory will then focus to reduce the % of all beds occupied by NCTR patients to 10% starting in Q1 of 24/25.

It remains three out of five projects have agreed their supporting metrics and are actively reporting (i.e. metrics that will lead to a reduction in the NCTR headline metric). The metrics

for the Transfer of Carre Hub have been agreed and the Cerner build change went live WC 18th September to enable the reporting of these metrics. The BI development work required to produce these report is continuing with the ambition to have in place at the earliest opportunity.

The care market sufficiency project aimed to increase the overall number of new hours picked up by 14% from 2,822hrs per month in April to 3,212hrs per month in September. Additionally, it aims to increase the number of new packages accepted by 10% from 263 packages per month in April to 288 packages per month in September. This trajectory has now been developed further, post September. Both metrics cover all referral sources (e.g. community and acute). October's data shows both metrics have achieved their trajectory target. The overall number of new hours picked up is 3248 against a target of 3086 and the number of new packages accepted is 328 against a target of 287.

The Virtual Ward project aims to double throughput on its frailty ward from 40 patients per month in November 22, to 80 patients per month in August, then to 120 per month in November 2023. For the respiratory virtual ward the project aims to increase throughput from 60 per month in August to 70 in September, then incrementally to 120 per month in November 2023. Cotober's data shows an increase in throughput on its frailty ward on the previous month, from 55 in September to 57 in October, the target of 80 was not met. Throughput on the respiratory ward increased on the previous month, from 51 in September to 58 in October, however not meeting the target of 90.

The HomeFirst service is undergoing a large-scale expansion to its core staff base. As such, it aims to increase the number of patients referred by the service by 215% from 54 patients per month in April 23 to 170 patients per month in January 24. Up to 88% of the patients referred into the service will be from the acute hospital and will be patients who would otherwise have remained in hospital with no criteria to reside. Performance for October shows that, overall, there has been an increase in referrals accepted on the previous month from 111 in September to 121 in October, however the target of 130 was not met. October's data shows that pick-ups from hospital have increased on the previous month from 111 in September to 121 in October, however the target of 130 was not met. October's data shows that pick-ups from hospital have increased on the previous month from 112 in October. 83 in September to 106 in October, however the target of 130 was not met. October's data shows pick-ups for CICC were 7 recognising there is no target set for October due to the focus on pick-ups from hospital

Community Reablement are yet to agree project level metrics. However, action plans are in place and being actively tracked and managed by the project SRO.

Enabling Programmes

Place Digital Maturity Programme

Programme SRO

Chris Mason

Programme RAG

Programme Commentary

Summary/Progress this month:

• We've initiated conversations with Wirral stakeholders with a focus on consolidating our digital programme portfolios and aligning them to create a Place-level portfolio. This will establish a baseline for assessing our current Digital Maturity scores at Place level, helping identify areas that require improvement and prioritisation for 2023-4 and beyond. • Additionally, we're initiating discussions with Wirral Senior Responsible Officers (SROs) to gain deeper insights into how the Digital Maturity programme can act as a enabler for other initiatives within the Wirral Health and Care plan, assisting in accomplishing their specific programme objectives.

Project updates: • CIPHA Migration - Migration from WCR to CIPHA is in initiation phase. We've engaged with system stakeholders to conduct a comprehensive gap analysis, which has enabled us to Which has instructed by the series of the ser

bigital Hypertension - Housebound project now closed - this aimed to facilitate Housebound Hypertensive patients in Wirral to engage with BP@Home and identify barriers. Key benefits have been recognised including provision of infrastructure for a significant proportion of this cohort to continue to engage with BP@home concept. We have subsequently proposed that this project is adopted and expanded across the rest of C&M. Further proposals have also been submitted to C&M to explore how we approach Hypertension P2 projects including Florence (automated SMS), health literacy apps, health checks etc. • Telederm - 1600+ cases raised, 45/45 Practices Live.

Escalations: Nil

Place Estates and Sustainability Programme

Programme SRO Paul Mason

Programme RAG

Programme Commentary

Summary: The established Sustainability and Estates Group (SEG) will provide a supporting mechanism for programme delivery. SEG has hosted good examples of system wide working previously and baselining work has been developed. This has supported the completion of some key milestone achievements:

- 1. Wirral Place Estates Programme (Completed) GB Partnership (attached)
- 2. Develop agreed RFI Register (Completed Q3 2022-23)
- 3. SEG Property Data Collection (Completed Q4 2022-23)
- 4. Green Plan and Associated actions plan oversight (Completed Q4 2022-23)
- 5. Wirral Place Sustainability Group established (Completed Q4 2022-23)

Progress this month Nov 23: - Estates & Sustainability SRO submitted papers to support Strategic Transformation Group update on progress so far.

- Estates & Sustainability SRO presented at Wirral Place Based Partnership Board receiving positive consensus and acknowledgement of work concluded today. - Feedback from Board to be reviewed at SEG scheduled for 18,12,23

- Areas of Focus for delivery via SEG: Finalise through SEG Governance arrangements and work packages for delivery.
- Continue to collate and validate asset data across all Partners of Place
- Advance the data and understanding of backlog condition and costs
- Understand and control demand for space and requirements
- Optimising Assets through void space management / leased cost opportunities and maximising utilisation across all Partners - Understand the future need of assets by aligning Assets to Clinical priorities/deprivation via the development of Neighbourhood strategies

Escalations/ Barriers to Delivery:

Progress this month:

- Need a good understanding of Clinical Drivers that will inform the Estates requirements and use of physical assets

Allowing information flow and decision making to be understood to provide system assurance.
 Group need sight of (PCN) GP developed clinical strategies.

- Assessment of requirements needs to integrated with Wiral Health Plan / programme
 Need to identify leads for transformational change programmes and work packages through the SEG forum. awaiting nominations
- Need funding to support systems and programme delivery

Place Medicines Optimisation Programme

Programme Commentary

A significant milestone has been met with the Wirral Place Medicines Optimisation Group meeting for the first time on the 6th December. This follows the agreement to create a single oversight group for MO delivery in Wirral, bringing together Medicines Management Committee and Wirral Pharmacy System Leads group, which aligns with wider Wirral Place MO and ICS governance arrangements. The group agreed their terms of reference.
 Indicative project leads have been identified for each of the 9 component MO projects but further discussions to take place to finalise these prior to next joint MO meeting in January

Place Workforce Programme

Programme SRO	Programme RAG	About the Programme
Debs Smith	•	W
		Place Workforce

Programme Commentary

Summary: The key activities to build the strategic workforce planning and programme enabling functions require the establishment of clear and achievable programme priorities for 2023-4 and beyond. From this an accountability and reporting framework for the wider programme will be established alongside agreed project sub-groups, leadership and membership.

Progress this month: The Workforce Programme steering group met on 5th December and agreed the key priorities to take forward in phase 1 of the programme. This incudes a baseline workforce profile for Wirral Place for which work has commenced, and a collaborative piece of work around entry into employment to pilot targeted support for a proposed cohort. of people aged 18-24yrs. Work will now commence to scope this. Escalations: None

			At Scale - Trajectories v Actual
	Programm	e Commentary	
ELECTIVE ACTIVITY n October 2023, the Trust attained an overall perform		patients and an overall performance of	87% against plan for elective admissions

Industrial action continues to impact activity delivered

REFERRAL TO TREATMENT ' The national standard is to have no patients waiting over 104 weeks from March 2023 and to eliminate routine elective waits of over 78 weeks by April 2023 and 65 week waits by March 2024. The Trust's performance at the end of October against these indicators was as follows: • 104+ Week Wait Performance – 0 • 78+ Week Wait Performance – 4

• 65+ Week Wait Performance - 355

52+ Week Wait Performance - 1908
Waiting List Size - there were 43,236 patients on an active RTT pathway which is higher that the Trust's trajectory of 38,916.

An in-depth analysis of waiting list size has been undertaken and key actions to address are underway across the divisions, including early escalation to clinical teams and proactively managing patient pathways ahead of breach dates. CANCER

• 2 Week Waits - This National standard has now been stood down. However, the Trust continues to measure performance internally to support the delivery of the FDS. At the end

of October 2WW performance was 84.3%. • Faster Diagnosis Standard (FDS) – was 72.09% in September (latest available data) against a National target of 75% by March 2024. This standard has been impacted by industrial action and subsequent inability to maintain the 2WW standard. • 31 day treatment numbers - above trajectory and expected to continue.

62 day treatment numbers - above trajectory and expected to continue.
62 day performance is currently below trajectory with 173 patients against a plan of 176.
104 day long waiters - performance is above trajectory at 50 against a plan of 33 for September:
As with all Trusts across C&M delivery of the 31and 62 day indicators remains a priority but given the increases in demand the recovery of performance against the targets remains a focus for 2023/24. The Trust is performing well when compared to other units but remains focussed on improving waiting times further for patient experience.

There continues to be a multi-disciplinary approach to improving the efficiency of cancer pathways and as expected is supporting decreased waiting times for Colorectal with a similar workstream commencing in Gynaecology

DIAGNOSTICS

In October 93.65% of patients waited 6 weeks or less for their diagnostic procedure for those modalities included within the DM01. This is against the national standard of 95% and requirement for Trust's to achieve 90% by March 2024. ECHO and CT remain challenged, however have recovery plans in place. MATERNITY
